

ROSTYSLAV TARASOV

JUNIOR PYTHON BACKEND DEVELOPER

Ebersbach-Musbach, Germany | +380 96 695 3384 | rostyslav.tarasov.l@gmail.com
github.com/loppify | linkedin.com/in/rostyslav-tarasov

PROFILE

Computer Science student focused on Python backend development, with project experience in REST APIs, asynchronous database access, and schema migrations. Building FormRelay, a personal MVP for sending website form submissions to Telegram. Seeking a junior backend, internship, or working-student opportunity in Germany.

TECHNICAL SKILLS

Backend: Python, FastAPI, Pydantic, REST APIs, JWT authentication, OpenAPI

Database: SQL, PostgreSQL, SQLAlchemy 2, asyncpg, Alembic migrations

Testing & tools: pytest, Ruff, GitHub Actions, Docker, Docker Compose, Git, Linux

Additional experience: JavaScript/TypeScript, Node.js, Express.js, React

SELECTED PROJECTS

FormRelay | Headless Form Backend

Personal project - ongoing MVP | Python, FastAPI, PostgreSQL, SQLAlchemy, HTTPX

- Built a service that gives static websites a form endpoint, stores submissions in PostgreSQL, and forwards notifications through the Telegram Bot API.
- Implemented async database operations, JSON and HTML form input, escaped notification formatting, and English, Ukrainian, and German interface translations.
- Added pytest flow tests with mocked Telegram calls and a GitHub Actions workflow for linting, formatting, testing, and triggering deployment.

API Notes Practice | Notes and Tasks API

Personal practice project | FastAPI, Pydantic, PostgreSQL, SQLAlchemy, Alembic, Docker

- Built task and tag APIs with Pydantic request/response schemas, async SQLAlchemy queries, relational associations, and versioned Alembic migrations.
- Implemented JWT login, password hashing, user-scoped task lists, and ownership checks on task and tag update/delete operations.
- Added unit tests for password hashing, token decoding, tag counts, and database constraints; configured a Docker Compose application and database environment.

ReFind | Lost-and-Found Platform

Team project | React, Node.js, Express.js, PostgreSQL, Socket.IO

- Contributed REST API endpoints and PostgreSQL schemas for lost-and-found listings, alongside a responsive React frontend.
- Implemented Socket.IO-based real-time communication as part of the team application.

EDUCATION

Kharkiv National University of Radioelectronics (KhNURE)

Bachelor of Computer Science (B.Sc.) | Expected June 2027 | Kharkiv, Ukraine

LANGUAGES

Ukrainian - Native | Russian - Fluent | English - B2
